Research Interests

I study learning guarantees of centralized and large-scale multi-agent systems. In particular, I work on establishing guarantees in the presence of phenomena such as heavy-tailed noise and various notions of heterogeneity, e.g., statistical heterogeneity between users' data, with a specific focus on providing tight guarantees for a single training run of an algorithm, which is achieved by characterizing the behavior of the tail probability of the resulting stochastic process. The goal of my work is to provide a comprehensive understanding of the performance of learning algorithms in the said settings, both in terms of training/convergence and generalization/statistical guarantees, with the aim of informing the practical design and implementation of algorithms in real-world applications, e.g., when training deep learning models. To that end, I draw upon tools from areas such as optimization and large deviations theory, concentration inequalities, as well as multi-agent and consensus theory.

Experience

Sep 2025 - Present	Post-doctoral researcher at EPFL, Lausanne, Switzerland *Adaptive Systems Laboratory* | Advisor: Prof. **Ali H. Sayed**
Aug 2020 - Aug 2025	Research assistant at Carnegie Mellon University, Pittsburgh, PA *Electrical and Computer Engineering* | Advisor: Prof. **Soummya Kar**
Sep 2019 - Dec 2019	Visiting researcher at University of Pennsylvania, Philadelphia, PA *Electrical and Systems Engineering* | Advisor: Prof. **Alejandro Ribeiro**
Nov 2018 - Jun 2020	Junior researcher at Faculty of Sciences, Novi Sad, Serbia *Numerical Analysis Group* | Advisor: Prof. **Dusan Jakovetic**
Jul 2018 - Oct 2018	Junior researcher at BioSense Institute, Novi Sad, Serbia
Feb 2018 - Jul 2018	Visiting researcher at FRI, Ljubljana, Slovenia *Bioinformatics Lab* | Advisor: Prof. **Blaz Zupan**

Education

Aug 2020 - Aug 2025	Doctor of Philosophy in Electrical and Computer Engineering College of Engineering, Carnegie Mellon University Thesis: "High-probability and Large Deviations Techniques for Design and Analysis of Large-scale and Distributed Learning Systems". [Link to thesis]
Oct 2016 - Oct 2018	Master of Science in Applied Mathematics Faculty of Sciences, University of Novi Sad Thesis: "Application of Autoencoders on Single-cell Data". [Link to thesis]
Sep 2012 - July 2016	Bachelor of Science in Applied Mathematics Faculty of Sciences, University of Novi Sad

PUBLICATIONS (IN CHRONOLOGICAL ORDER, * = EQUAL CONTRIBUTION)

Awards

2023 IBM PhD Fellowship - Finalist. One of three nominees by the Electrical and Computer Engineering Department, Carnegie Mellon University
2020 Dean's Fellowship from the Electrical and Computer Engineering Department, Carnegie Mellon University
2019 Annual Award of the Mathematical Institute of the Serbian Academy of Sciences and Arts in the field of computing for M.Sc. students - Finalist

Academic Service

- *Conference reviewer:* IEEE ISIT, AISTATS, ICML, NeurIPS.
- *Journal reviewer:* IEEE Transactions on Signal Processing, Journal of Machine Learning Research.
- *Student supervision:*
    1. **Haoyuan Cai** (PhD student, EPFL, fall 2025 - present): actively supervising and collaborating since joining prof. Sayed's group. The supervision resulted in publications [1,2].
    2. **Himkant Sharma** (research intern, CMU, summer 2024): supervised for the duration of the internship in prof. Kar's group. The supervision resulted in publication [10].
- *Teaching:* Served as teaching assistant for the course "Linear Systems" in Electrical and Computer Engineering Department, Carnegie Mellon University, in 2022 and 2023.
- *Student council for faculty hiring:* Served in the Electrical and Engineering Department's student council for faculty hiring in 2023. Participated in interviewing faculty candidates, with the goal of evaluating the candidates' potential to advise graduate students.

Talks and Presentations

2025 *33st European Signal Processing Conference*, Palermo, Italy
2025 *28th International Conference on Artificial Intelligence and Statistics*, Mai Khao, Thaliand
2024 *58th Asilomar Conference on Signals, Systems, and Computers*, Asilomar, USA
2023 *31st European Signal Processing Conference*, Helsinki, Finland
2022 *39th International Conference on Machine Learning*, Baltimore, USA
2019 *EUROCON 2019*, IEEE, Novi Sad, Serbia
2018 *US-Serbia & West Balkan Data Science Workshop*, NSF Serbia, Belgrade, Serbia
